**CONTRIBUTION DUBLYANY FIELD CROPS SCHOOLS (ACADEMY)  
IN THE DEVELOPMENT OF AGRICULTURAL SCIENCE AND  
RESEARCH BUSINESS IN EASTERN GALICIA  
(MID XIX – EARLY XX CENTURY)**

**Summary**

Traced the origin of agricultural science and research sector affairs in eastern Galicia mid XIX – early XX century by the example Dublyany tillage School (Academy). It was found that the activity of the institution aimed at education specialists and a wide profile formation that could with no problems create new landlord economy and improve existing ones. Notes that in 1876 the school was not only educational, but also research institution with its own network of laboratories, museums, research stations and field, educational farm, botanical garden.

**Keywords:** *agriculture, agricultural science, research, agricultural research affairs, scientific papers, Dublyany tillage school (Academy), eastern Galicia.*
