**EVOLUTION OF SCIENTIFICALLY-ORGANIZATIONAL BASES
OF DOMESTIC MOTOR INDUSTRY: HISTORIOGRAPHY OF PERIOD
OF INDEPENDENCE OF UKRAINE**

Summary

It is set that in independent Ukraine the period predefined by the searches of the new conceptual going near historical cognition began in historiography of motor industry. Due to comparatively wide access to the archived sources possibility appeared full and impartiality to light up the historical processes of evolution of scientifically-organizational bases of motor industry in Ukraine. Historiography began to act part integration factor, supporting the corresponding level of knowledge, keeping and complementing the methodological vehicle of modern historical science. It is found out, that the row of rich in content scientific works that contain the systematized actual material in relation to development of car production is published in the last decades, sound analysis of scientific technologies and them theoretical generalizations.

Certainly, that historical labours of period of independence of Ukraine are marked by development according to plan and richness of content of generalizations,

by objectivity of going near research of evolution of scientifically-organizational bases of motor industry in Ukraine. The processes of ideologizing and politicizing, characteristic for development of engineering science of previous period, are system investigational first. History of separate branch and technical higher educational establishments and research establishments is found out, a contribution is appraised to development of scientific bases of motor industry of the known Ukrainian scientists. If scientists-engineers carried out in the previous periods of determination of evolution of branch scientific thought mainly, then in the last decades she became the article of researches of the Ukrainian historians of science, that assisted an objective and integral recreation her separate processes and conformities to law, provided with an input actually of historical methods and approaches. At the same time summarizing labours that would provide the integral scientifically-historical analysis of evolution of motor industry in Ukraine, payment of branch, academic and technical higher educational establishments and research establishments, research collectives, and also separate scientists in development of him scientific bases it is not yet presented, that predetermines research actuality.
