**CREATION OF A SCIENTIFIC AGRARIAN DISCOURSE AT THE END
OF THE 20S - IN THE 30S. XX century in the Ukrainian SSR**

The article is devoted to the consideration of the process of accumulating knowledge about the formation and further development of the scientific-organizational and theoretical-methodological foundations of agrarian science and research in this segment of the historical path of Ukraine. Based on the use of subject-chronological and comparative-historical methods, the historiographic developments of researchers are highlighted, which form certain blocks in relation to chronology, topics, methodology. It has been established that historiographic works of the Soviet era are characterized by a variety of thematic content of publications and methodological approaches, highlight aspects of the development of branch science, contribute to a critical rethinking of the historical process, in particular the late 1920s and 1930s. XX century. Modern researchers, based on the results of processing archival materials, actualize solutions to common problems of the formation and further development of domestic research, the creation of new directions and teachings, taking into account the historical experience of leading

scientific schools and personification of the history of agricultural science in Ukraine. The fundamental role of V.V. Wienera, S.A. Zakharova, S.P. Kulzhinsky M.K. Nedokuchaeva, A.K. Filippovsky, A.A. Yanati et al. in the formation of a theoretical and methodological basis for the evolution of domestic industry experimentation in the period under study.

Key words: *agricultural science, research, institutionalization, historiographic work, history of development, scientific and organizational foundations, methodology.*
